

Mario Alberto Chiorino is Senior Professor of Structural Mechanics and of Structural Assessment and Rehabilitation of Architectural Heritage at the School of Architecture of the Politecnico of Torino, Italy. He is a member of Turin Academy of Sciences, fellow of the American Concrete Institute and member of its International Committee, and a member or past-member of various technical committees and international organizations like ACI, FIB, CEB, RILEM, IABSE and IASS. He has been a designer of large concrete structures (bridges, tall chimneys, pipes for thermo-electrical and nuclear power plants, etc.), and a consultant for structural conservation of monumental buildings, and is responsible for the program of assessment, monitoring and rehabilitation for the world's largest elliptical masonry dome at Vicoforte, in north-west Italy.
