

Role of dome in Mazary (Case Study : Mahmoud Joshan-Ahmad Abazari Mazary in Yazd)

Khosro Behrouzi , Hamid Reza Eshaghi

Abstract

Mazarys are the specific buildings of Iran central desert areas. Application of these buildings is for milling the spices, henna,... which has been done by camel force that climate and application have significant role in its formation. The Dome is the most important application section of building, that because of its specific shape and application has been acquired some characteristics during times and air conditioning is done by louvers with different directions and lighting is done via dome upper Mazarys and also trap doors at dome body, its shape and location is special, considering the necessity of indirect light absorption. Aim of this article is to introduce the dome and its parts in Mazary building that it will be discussed considering the application of all Mazarys. This is a field study in case review area in Yazd province.

Keywords Mazarys are, Dome, louvers
